Subject: NASTTPO Houston Conference Update - Yes, it's still on !

Not only is the conference ON for October 16-18, but we can now confirm some additional excellent speakers.

CSB Board Member Dr. Kristen Kulinowski and Dr. Rachel Meidl, the new Deputy Associate Administrator at DOT responsible for HMEP, both will speak. We will also have programs on EPA's efforts to enhance coordination and cooperation among the SERCs in its three Western Regions; Donna Lepik will present on Transcaer; representatives from NOAA will discuss CAMEO Software Suite Developments; and many others.

It's going to be an excellent conference and I hope to see you there.

Registration and logistical information is at www.nasttpo.com
